

ESSP

Employee Self Service Portal

The employee-facing half of an enterprise HR platform — the screen a person opens to check attendance, apply for leave, and see who's celebrating a birthday. Audited end to end.

ROLE	TYPE	SURFACES	DELIVERABLES
UI design, design system, visual audit	Enterprise web app — white-label deployment	Sign-in, employee dashboard	Palette tokens, type scale, components, WCAG audit

Hue kept for recognition — only lightness moved, from aqua to teal.

OVERVIEW

An employee portal, audited end to end

This case study documents the visual system behind two surfaces: a white-labelled sign-in built for the client's brand, and a dense, warm dashboard built for daily use.

- PERSONAL
 - Calendar, attendance codes, summary chips, mood check-in
- ACTIONS
 - Six pastel tiles, four quick pills, celebrations strip
- SOCIAL
 - Posts, Events, Announcements, News Feed

Three problems the screens revealed

01	02	03
+50pt	4 colours	1.25:1
Two systems, one product	Colour without meaning	An invisible attendance code
		
Sign-in sits at 16–37% lightness. The dashboard sits at 61–94%. A user crosses fifty points of luminance in one click, and not one brand colour survives the journey.	Four action pills use Bootstrap's contextual defaults verbatim. Blue, green, amber and purple differentiate four buttons — they don't signal four states.	The COFF code renders in aqua on white — a contrast ratio of 1.25:1, in the calendar an employee reads to confirm they were paid correctly.

One fix that mattered most

Hue is kept for recognition — only lightness changes, so the legend still reads as a colour system. Every code keeps its letters, so the calendar survives greyscale print and colour blindness.

BEFORE · AQUA #66FFFF	AFTER · TEAL #8B7285
	
1.25:1 FAIL	5.59:1 PASS
WCAG 2.1 AA requires 4.5:1 for body text.	WCAG 2.1 AA requires 4.5:1 for body text.

Secondary fixes. Six pastel tiles gained a 1px border to hold their edge against white cards. The amber pill label moved to ink — white on #FFC107 measured 1.9:1.

03 — FINAL SCREENS · SURFACE 01

The sign-in screen

Navy to indigo across the diagonal, concentric orbit rings, and a single hot magenta in the client mark. The auth card floats on slate, clear of the gradient.

03 — FINAL SCREENS · SURFACE 02

The employee dashboard

Three columns: personal data on the left, actions in the centre, the company wall on the right. Pale sky field, white cards, one full-width greeting gradient.

04 — STYLE GUIDE

Two palettes, one product

Identity values are tenant-owned and change per deployment. Surface values are structural and fixed. Keeping them in separate layers is what makes white-labelling work.

Identity — tenant owned	Surface — structural
Changes wholesale per deployment	Fixed across every deployment
 Brand Indigo #2E3192	 Sky Field #D0F1FF
 Brand Magenta #ED088C	 Banner Deep #189903
 Navy #131448	 Ink #141C2E
 Sky Accent #38B0F8	 Border #E688F
Logo body, links	Page background
Logo accent — the single hot colour	Greeting gradient stop
Gradient origin	Body copy, headings
Sub-lockup, orbit node	Card edge, 1px

Mint #E2FFF7	Blush #FFF6F6	Sand #F3EAE1	Lavender #E6ECFC	Peach #FFF7F1	Ice #EBF9FF
--------------	---------------	--------------	------------------	---------------	-------------

05 — STYLE GUIDE

Geometric for voice, grotesque for data

Poppins carries display and headings at 300 / 400 / 500 / 700. Inter runs the interface and data at 400 / 500 / 600 / 700.

DISPLAY / 700	Leave
H1 / 600	Leave
H2 / 500	Leave
BODY / INTER	Leave
CAPTION / INTER	Leave
CODE / MONO	Leave

06 — STYLE GUIDE

The pattern library

GREETING BANNER	QUICK PILLS	ATTENDANCE CODES
